

HP Deskjet Control Panel for DOS Installation

This program should be downloaded and installed in order to set the default page length on your HP Deskjet 600 series printer for DOS printing. This eliminates the problem of printing going on to 2 pages when printing in DOS programs such as SIMS LRM and SIMS Attendance. The factory setting for these printers when printing in DOS programs is American “Letter” size paper and this needs to be changed to A4 size paper.

Important

The installation program must be downloaded to the **C:\DESKJET** directory. To create this directory if one does not exist:

For Windows 95/98

Select Start, Programs, MS DOS Prompt

For Windows 2000

Select Start, Programs, Accessories, Command prompt

Type CD\ <Enter>

Type MD DESKJET <Enter>

Type EXIT <Enter>

Downloading

- Once you have a **C:\DESKJET** directory
- Click on the download link for the HP Deskjet Control Panel (DJCP) software
- Select “**Save this program to disk**” & Click **Ok**
- Change the file name to **C:\DESKJET\DJCP.EXE** & click Save
- Click “**Open**” (if you get a message about Winzip Self Extractor not being licensed, click **OK**).

- Check that “**Unzip to folder**” reads **C:\DESKJET** & click “**Unzip**” then click **OK** on the number of files unzipped successfully.
- Click on “**Close**” to close winzip self extractor
- Select Start, Run & type **C:\DESKJET\INSTALL\INSTALL.EXE**, then click **OK**
- Press **A** to Agree to License
